

Accelerate B2B sales and streamline customer support with AI Agents

About Me

Hrushikesh Dokala

Lead GenAI Consultant
VEnableAI

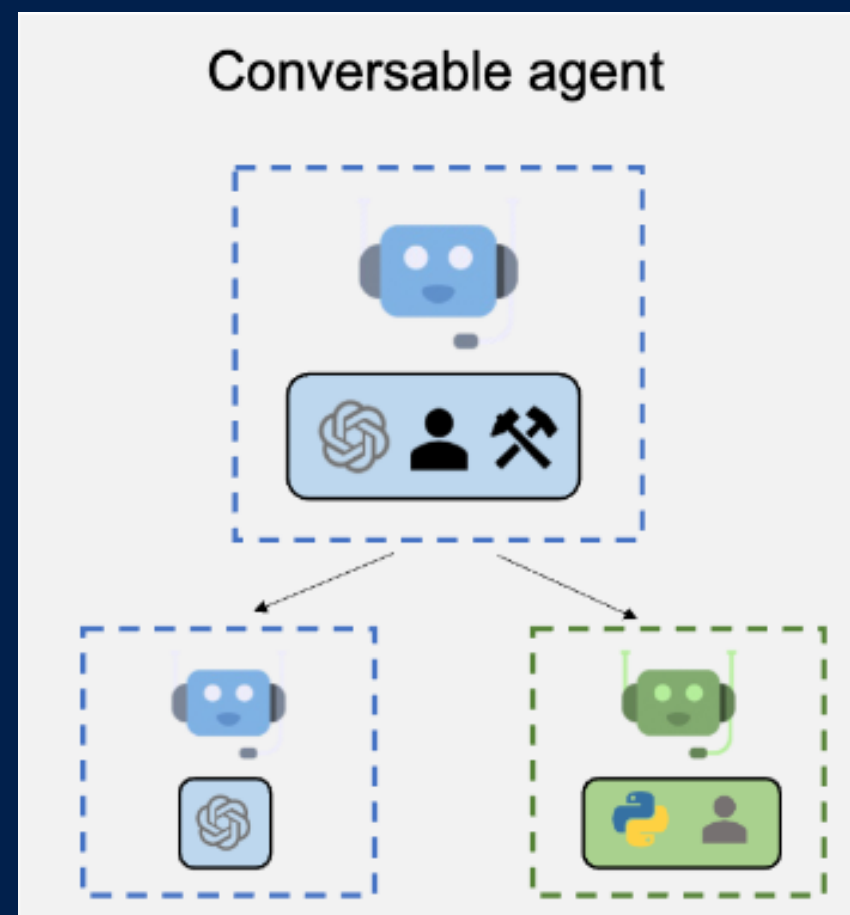

- Maintainer at AutoGen (Microsoft)
- Beta Microsoft Learn Student Ambassador
- Co-organizer at FAIght Club

AI Agents

- AI programs that can make decisions and take actions on their own.
- It is more like giving the Agent a goal(Generate Leads) and let the Agent figure out the steps.
 - It can use the tools (APIs)
 - Plan its approach
 - Get evaluations
 - etc...

Autogen

- A Multi Agent framework that enables development of LLM applications using multiple agents that can converse with each other to solve tasks.

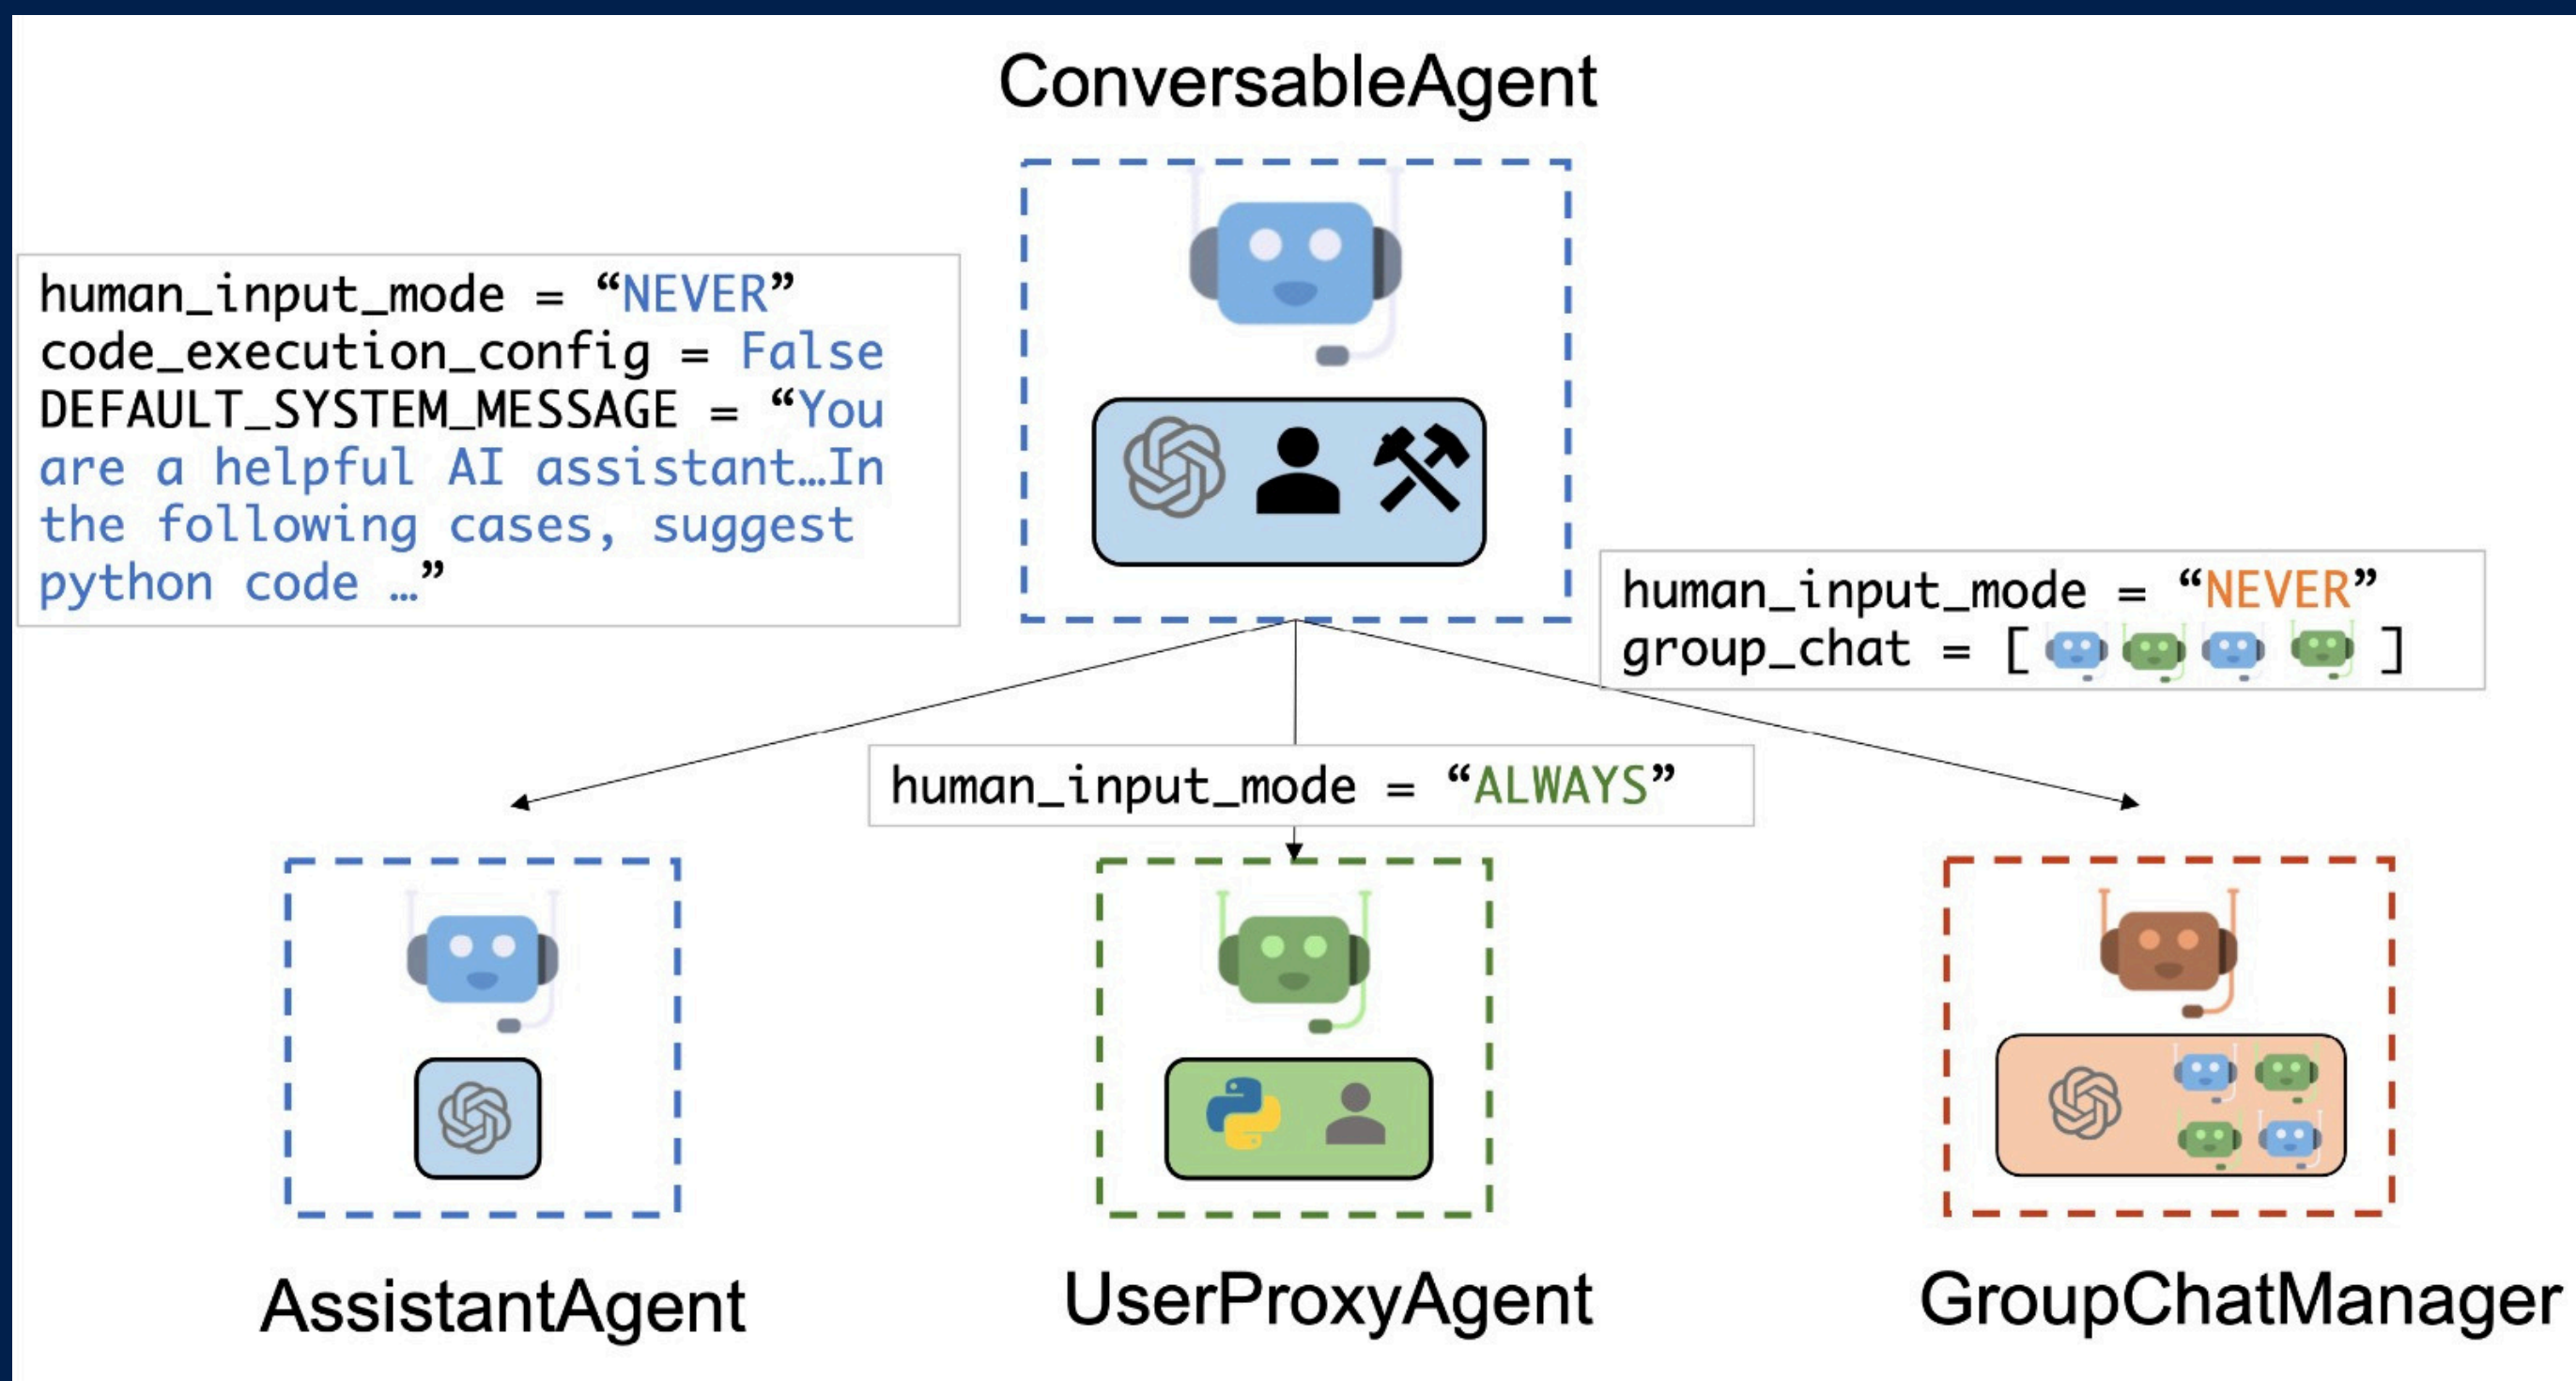

We can setup a virtual company with the AI Agents and let the agents do the work for you.

Use Cases:

- outreach agent
- customer support agent

Thank You
